

FOR IMMEDIATE RELEASE

TruStar Energy Expands Fuel Solution Offerings with the Launch Of their Compact Fuel Solution Program ("CFS")

(White Plains, NY) July 24, 2017 – TruStar Energy LLC (TruStar), one of the nation's leading developers of compressed natural gas (CNG) fueling stations, today announced the launch of their Compact Fuel Solution and CNG Fleet Development Program ("CFS Program"). TruStar's CFS Program provides smaller fleets the ability to gain the benefits of CNG fuel and fleets fueling at public CNG stations the ability to lower their costs.

"We are excited for the launch of our CFS Program," said Adam Comora, President of TruStar Energy LLC. "Our CFS Program was designed to address the needs of smaller fleets, pilot programs for larger fleets and those looking to improve their current public fueling experience."

"We have heard the voice of customers and are excited to offer this solution," said TruStar's Chief Operating Officer, Scott Edelbach. "In addition, the CFS Program allows us the ability to offer a private, convenient fuel solution without a capital or take or pay commitment. TruStar Energy takes care of this. All you do is call us and 6 months later fuel up."

Contact TruStar Energy today for more information on our CFS program and learn how you can save time and money with CNG fueling. As with all TruStar fueling programs, renewable CNG is available with our CFS program for additional sustainability and cost savings benefits.

About FORTISTAR

TruStar Energy, a subsidiary of Fortistar, is one of the nation's leading developers of Compressed Natural Gas (CNG) fueling stations.
